METHOD FOR OBTAINING COCHLEAR STRCUTURES. VACCINE COMPOSITIONS AND ADJUVANTS BASED ON COCHLEAR STRUCUTRES AND THEIR INTERMEDIARIES

## 5 **SUMMARY**

10

The present invention has applications in the field of immunology, specifically in the sphere of adjuvants and vaccines. The invention aims at obtaining cochlear structures from vesicles found in the outer membranes of microorganisms, in order to employ them in the preparation of adjuvants and vaccines. The invention also discloses a method for obtaining cochlear structures.
